In brief

DIYglobal is the internet service that offers current news, background reports and core data for the international DIY and garden sector. DIYglobal offers weekly updated news from commerce and industry, which is also sent as a newsletter. Supplementary articles add depth to the current section and to topics included from the magazine DIY International. One major section offers statistics on the DIY retail and garden centre scene, the individual retail groups and different product categories. All the articles published in DIY International can be accessed in the archive. The range is rounded off by further tools that include new products, buyers' guide and previews of the next issue. This service is available in German at www.DIYglobal.de and in English at www.DIYglobal.com.
